

## **NXT Encapsulation Carpet Cleaner.**

**NXT** incorporates crystallizing polymer technology which enables residual encapsulated soil to be continually removed from the carpet with subsequent vacuuming. The dried polymer does not attract dirt or soil and helps to ensure the carpet stays cleaner longer. **NXT** allows carpets to be effectively cleaned and returned to use quickly if used with CRB low moisture or foaming cleaning systems. **NXT** is suitable for use on most carpet fibers including wool.

**Uses:** Carpet, Rug Cleaning, Spot Cleaning (33 oz. to 128 oz. water or 1:3 mix ratio)

### **NXT — Gallon Concentrate**

#### **Carpet Cleaning – Low Moisture Method**

1. Always pre-test a small inconspicuous area prior to first use.  
Pre-vacuum your carpet to remove dry soils.
2. Apply **NXT** with a hand-held, pump-up sprayer or via an auto-spray delivery system, covering an area not larger than can be cleaned within a 15 to 20-minute window.  
**Lightly Soiled: 8 oz. per 1 Gallon of Water**  
**Heavily Soiled: 12 oz. per 1 Gallon of Water**
3. For best results, agitate **NXT** into the carpet using a CRB (counter-rotating brush machine), GVX spotter brush, or a soft bristled brush.
4. After **NXT** is completely dry, vacuum the area with a vacuum cleaner that has a beater brush. A dual motor, upright vacuum that is Carpet and Rug Institute Silver or above certified is recommended.

### **NXT — 32 oz. Spotter**

1. Apply **NXT** diluted at 33 oz. - 1 gallon (1:3 mix ratio) of water to the stain. Note that our 32 oz. **NXT** spotter is already pre-mixed to a 1:3 ratio.
2. Allow to dwell 1-2 minutes and agitate the stain with a brush working outside in.
3. Remove by blotting with microfiber towel, mop or extractor.
4. If the stain remains, repeat steps above. Please note that some stains may require GVX Pro for effective removal.
